

DEBUGUEO NETBEANS

The screenshot shows the Apache NetBeans IDE 15 interface. The main window displays the source code of `ProyectoPrueba.java`. The code is as follows:

```
10 /**
11  *
12  * @author luis
13  */
14 public class ProyectoPrueba {
15
16     public static void main(String[] args) {
17         ArrayList<Camara> lista_camaras=ParseoXML.parsear();
18         for (Camara camara : lista_camaras) {
19             System.out.println(":"camara);
20         }
21     }
22 }
```

The left sidebar shows the project structure. The `main` method is selected, and the `main(String[] args)` method is visible in the `Members` pane.

The bottom pane shows the `Variables` window, displaying the state of the `main` method's arguments and the `lista_camaras` array.

Name	Type	Value
